※Symptoms may be delayed.

(Symptoms when skin and/or eye contact)

Redness of the eyes. Pain. Blisters. Severe deep burns.

Indication of any immediate medical attention and special treatment needed

The symptoms of lung oedema often do not become manifest until a few hours have passed and they are aggravated by physical effort.

Rest and medical observation are therefore essential.

Section 5. Fire-fighting measures**Extinguishing media****Suitable extinguishing media**

In case of fire, use dry powder, CO₂, dry sand to extinguish.

Not combustible but enhances combustion of other substances.

Unsuitable extinguishing media

Never use water.

Specific hazards arising from the substance or mixture
